

Introducing Pinnacle Enhanced Safety Options

Option A: GPS System with Contact Tracing

This system is highly sophisticated and includes:

- Prox card contact tracking – maintains a database of all vehicle riders utilizing contact free prox card technology, allowing tracking of all vehicle riders at all times
- GPS Vehicle mapping – utilizes GPS technology and downloadable mobile phone application to track vehicles enroute and allows riders to determine approximate arrival / departure times

The above can be included for as low as **\$1.85 per hour**.

Option B: GPS System

This is a simplified and equally sophisticated system which includes:

- GPS Vehicle mapping – utilizes GPS technology and downloadable mobile phone application to track vehicles enroute and allows riders to determine approximate arrival / departure times

The above can be included for as low as **\$0.77 cents per hour**.

Option C: Protective barriers for the buses

- Option 1: Driver bus barrier..... **\$0.31 cents per hour installed**
- Option 2: Rear driver barrier.... **\$0.21 cents per hour installed**
- Option 3: Passenger protective Sneeze Guard.... **\$0.02 cents per hour self-install**

Option D: Self-service temperature kiosks

- Pinnacle can supply you with self-checking kiosk thermometers which can be installed throughout your building(s) to monitor patrons, guests and staff.

Pricing based on quantity required

Sample pricing is based upon a 3-year contract with 12 hours of daily service utilizing 2 buses. Cost may vary depending on length of contract and total hours of service. If contract is cancelled before its scheduled date all upfront costs are to be paid in full. State and local taxes must be added.
